The following table represents the East German chemical industry's fulfillment figures for the period 1 January - 31 December 1958. All quantities are expressed in metric tons, except where otherwise specified.

| <u>PRODUCT</u>                     | <u>1958 Plan</u> | <u>Actual</u> |
|------------------------------------|------------------|---------------|
| Brown hematite (Manganese dioxide) | 1150             | 1164.0        |
| Lithium compounds                  | 2.9              | 2.7           |
| Acetylcellulose                    | 50               | 50.0          |
| Activated carbon                   | 248              | 248.0         |
| Anilin oil                         | 800              | 833.4         |
| Fuller's earth                     | 3820             | 3672.2        |
| Borax                              | 3625             | 3344.1        |
| Boric acid (1.5 tons borax)        | 250              | 149.0         |
| Cadmium sulphide                   | 6.455            | 6.355         |
| Ferrous sulphate                   | 1500             | 1526.7        |
| Glycerine                          | 670              | 625.4         |
| Rubber accessories                 | 175              | 174.2         |
| Bone black                         | 40               | 39.5          |
| Cobalt Compounds                   | 5                | 5.1           |
| Metal compounds (thousand rubles)  | 955              | 1820.6        |
| Sodium perborate                   | 10               | 10.0          |
| Nickel sulphate                    | 600              | 600.6         |
| Perbunan regenerate                | 30               | 30.0          |
| P2O5                               | 191850           | 180763.9      |
